A decorative border of stylized floral and leaf motifs in white, yellow, and orange, framing the central text on a green background.

*Reproductive parts  
of a plant -  
Androecium.*

# *Materials Required*

- ❖ Chart Paper
- ❖ Cardboard
- ❖ Jute sheet paper
- ❖ Corrugated paper.
- ❖ Glue

# *Instructions*

## *Step - 1*

- ✦ The first step is to create a base.
- ✦ The diagram is created on A3. In order for better ease, here a chart paper is cut out in A3 size ( 29.7 x 42 cm)
- ✦ This chart can then be stuck onto a hard cardboard which would give better stability.

## Step - 2

- ✦ The next step is to create one of the two parts of the androecium.
- ✦ The first part is create the filament.
- ✦ This is made out of jute sheet paper.
- ✦ For accurate shape, a printed diagram is used for reference. The print out is cut out.

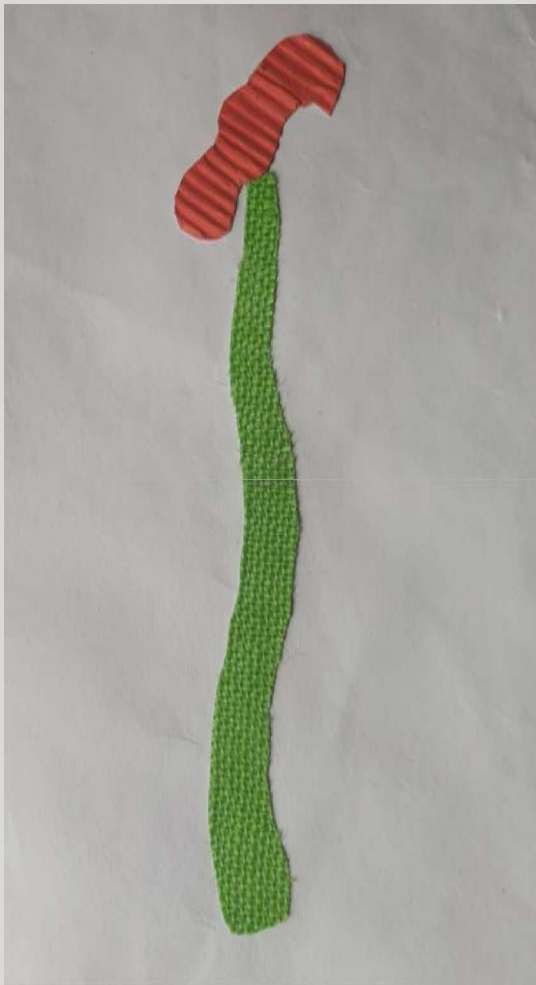

- + The print out is stuck to the smooth side of jute sheet.
- + This piece is then cut out.
- + The cut out is stuck onto the base created earlier.

## Step - 3

- + The next part is to create the anther.
- + This part is made out of red corrugated paper.
- + To start off, a basic figure was drawn on a plain sheet of paper.
- + It is then stuck on on the smooth side of the corrugated paper.
- + It is then cut off. This part is then stuck onto the base which was made earlier

*Thank You!*
